Marks Distribution out of 100:

25 Marks for Internal Assessment,

+ 25 Marks for Practical examination

+ 50 Marks for Theory Paper

SUBJECT: BOTANY

Subject prerequisites:

- 1. To study Botany, a student must have had the subject Biology/Biotechnology learnt at 10+2 level.
- 2. Keen interest in plants and plant-related research, Potential in mathematics, biology and chemistry
- 3. Skills and aptitude for scientific study and research
- 4. Creativity and good comprehension while working on scientific procedures and research
- 5. Computer aptitude.

COURSE INTRODUCTION

The new curriculum of B.Sc. in Science (Botany) offers essential knowledge and technical skills to study plants in a holistic manner. Students would be trained in all areas of plant biology using unique combination of core, elective and vocational papers with significant inter-disciplinary components.

Students would be exposed to cutting-edge technologies that are currently used in the study of plant life forms, their evolution and interactions with other organisms within the ecosystem. Students would also become aware of the social and environmental significance of plants and their relevance to the national economy.

B.Sc. Botany program covers academic activities within the classroom sessions along with practical concepts at laboratory sessions. Infield, outstation activities and projects are also required to be organized for real-life experience and learning.

Candidates who have curiosity in plants kingdom, ecosystem, love exploring exotic places and wish to work as researchers or professions like Botanist, Conservationist, Ecologist, etc. can choose B.Sc. Botany course.

Program outcomes (POs):

and their domestication.

Transformed curriculum shall develop educated outcome-oriented candidature, fostered with discovery-learning, equipped with practice & skills to deal practical problems and versed with recent pedagogical trends in education including e-learning, flipped class and hybrid learning to develop into responsible citizen for nation-building and transforming the country towards the future with their knowledge gained in the field of plant science.

CBCS syllabus with a combination of general and specialized education shall introduce the **PO 1** concepts of breadth and depth in learning Shall produce competent plant biologists who can employ and implement their gained PO₂ knowledge in basic and applied aspects that will profoundly influence the prevailing paradigm of agriculture, industry, healthcare and environment to provide sustainable development. **PO 3** Will increase the ability of critical thinking, development of scientific attitude, handling of problems and generating solution, improve practical skills, enhance communication skill, social interaction, increase awareness in judicious use of plant resources by recognizing the ethical value system. **PO 4** The training provided to the students will make them competent enough for doing jobs in Govt. and private sectors of academia, research and industry along with graduate preparation for national as well as international competitive examinations, especially UGC-CSIR NET, UPSC Civil Services Examination, IFS, NSC, FCI, BSI, FRI etc. Certificate and diploma courses are framed to generate self- entrepreneurship and self-**PO 5** employability, if multi-exit option is opted. Lifelong learning be achieved by drawing attention to the vast world of knowledge of plants **PO 6**

Programme specific outcomes (PSOs):

B.Sc. I Year / Certificate course in Microbial Technology & Classical Botany

This Programme imparts knowledge on various fields of plant biology through teaching, interactions and practical classes. It shall maintain a balance between the traditional botany and modern science for shifting it towards the frontier areas of plant sciences with applied approach. This syllabus has been drafted to enable the learners to prepare them for self-entrepreneurship and employment in various fields including academics as well as competitive exams. Students would gain wide knowledge in following aspects:

- 1. Diversity of plants and microbes their habitat, morphology, architecture and reproduction.
- 2. Plant disease causing microbes, symptoms &control.
- 3. Economic value of plants and their use in Human Welfare.

Programme specific outcomes (PSOs):

B.Sc. II Year/ (Diploma in Plant Identification, Utilization & Ethnomedicine)

This course provides a broad understanding of identifying, growing and using plants. This course is primarily aimed to introduce people to the richness of plant diversity found in surrounding areas. Lecture sessions are designed to cover fundamental topics concerning classification of plants and their utilization required for understanding the flora and vegetation. Practical sessions are organized following theory for easy understanding of the various parts of the plants, structural organization of floral parts and diversity therein. Participants are taken to different locations covering a variety of habitats and forest types to acquaint them with the native flora. in the long run, will contribute towards building momentum for people's participation in environmental conservation without compromising on academic rigor and our rich wealth of knowledge inherited over generations.

- 1. The course will cover conventional topics in Field Botany like Evolutionary History & Diversity of Plants, Complete Morphology, Nomenclature of plants, Systems of Classification, Keys to Important Families of Flowering Plants, Field Data Collection & Herbarium Techniques.
- 2. The course is designed to become a commercial crop grower, florist, protected cultivator, green belt plant advisor to industries, pharmacologist & taxonomist.

Programme specific outcomes (PSOs): B.Sc. III Year / Bachelor of Science

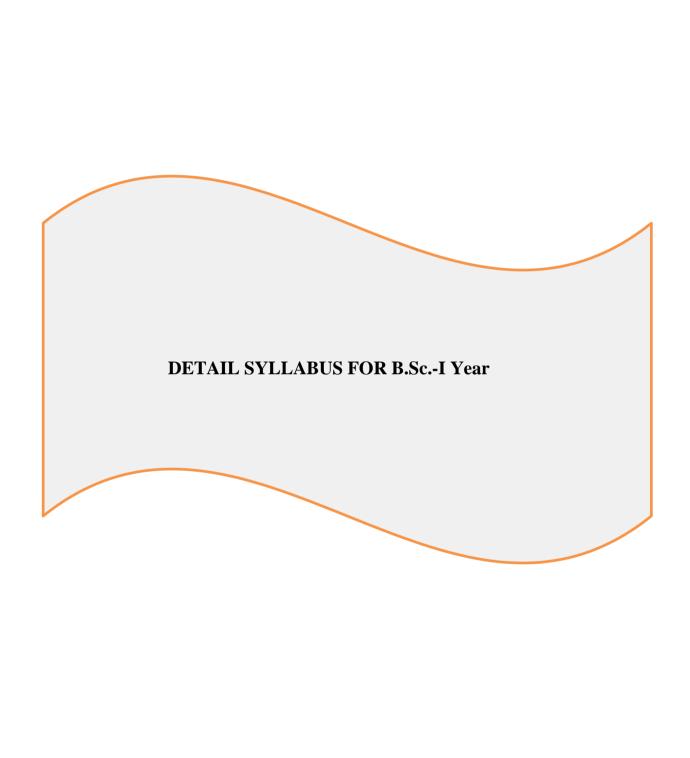

The learning outcomes of three years graduation course are aligned with program learning outcomes but these are specific to-specific courses offered in a program. The core courses shall be the backbone of this framework whereas discipline electives, generic electives and skill enhancement courses would add academic excellence in the subject together with multi-dimensional and multidisciplinary approach.

- 1. Understanding of plant classification systematics, evolution, ecology, developmental biology, physiology, biochemistry, plant interactions with microbes and insects, morphology, anatomy, reproduction, genetics and molecular biology of various life-forms.
- 2. This course is suitable to produce expertise in conservation biology like ex-situ conservation, response to habitat change, genotype characterization and reproductive biology.
- 3. Understanding of various analytical techniques of plant sciences, use of plants as industrial resources or as human livelihood support system and is well versed with the use of transgenic technologies for basic and applied research in plants.

- **4.** Understanding of various life forms of plants, morphology, anatomy, reproduction, genetics, microbiology, molecular biology, recombinant DNA technology, transgenic technology and use of bioinformatics tools and databases and the application of statistics to biological data.
- **5.** Entrepreneurship Skill Development, Understand the issues of environmental contexts and sustainable development, Inculcation of human values,
- **6.** Strengthen mathematical and computational skills. Enable students to use ICT&AI effectively.
- **7.** Develop good skills in laboratory such as observation and evaluation by the use of modern tools and technology.

Understanding the nature and basic concepts of all the plant groups, their metabolism, components at the molecular level, biochemistry, taxonomy and ecology. The course will make them aware of natural resources and environment and the PSO₁ importance of conserving it. Hands on training in various fields will develop practical skills, handling equipment's and laboratory use along with collection and interpretation of biological materials and data. Knowledge gained through theoretical and lab-based experiments will generate technical personnel in various priority areas such as genetics, cell and molecular biology, plant systematics and biotechnology. Botanists are able to contribute to all these fields and therefore, are mainly employed with educational institutions, government or public sectors or companies in industries, such as agriculture or forestry, oil, chemical, biotechnology, geological survey, environmental protection, drugs, genetic research, plant resources laboratories, plant health inspection services, lumber and paper, food, fermentation, nursery, fruit and so on. PSO₂ Jobs available as a botanist: •Microbiologist, plant pathologist, Taxonomist • Plant Physiologist • Plant Biochemist • Researcher • Mycologist • Ecologist • Weed Scientist • Palaeobotanist • Conservationist • Fruit Grower • Morphologist • Cytologist • Ethnobotanist • Plant geneticists etc. Inculcate strong fundamentals on modern and classical aspects of Botany, understand knowledge of Botany is an essential pre-requisite for the pursuit of many applied PSO₃ sciences. It will facilitate students for taking up and shaping a successful career in Botany and allied sciences. Introduction of research project will inculcate research aptitude and passion for higher **PSO 4** education and scientific research.

Internal & External Assessment				
Internal Assessment	Marks	External Assessment	Marks

This course can be opted as an elective by the students of following subjects: Open to all but special for B.Sc. Biotech, B.Sc. Microbiology, B.Sc. Agriculture, B.A. (Curators), B.A. Archaeology, B.A. Geology, BAMS.

Course prerequisites:

Qualification: To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Biotech/ Forestry/ Microbiology/Gardening/biomedical Science.

Facilities: Smart and Interactive Class

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts

Programme: B.Sc.			Year: I	Paper-II Practical
	Subj	ect: Botany		
Course Code: B040102P		Course Title: Techniques in M	icrobiolo	gy & Plant Pathology

Course outcomes: After the completion of the course the students will be able:

- 1. Understand the instruments, techniques, lab etiquettes and good lab practices for working in amicrobiology laboratory.
- 2. Develop skills for identifying microbes and using them for Industrial, Agriculture and Environment purposes.
- 3. Practical skills in the field and laboratory experiments in Microbiology &Pathology.
- 4. learn to identify Algae, Lichens and plant pathogens along with their Symbiotic and Parasitic associations.
- 5. Can initiate his own Plant & Seed Diagnostic Clinic
- 6. Can start own enterprise on microbial products

Unit Topic * (Minimum Any three from each unit depending on facilities)

No. of Lectures (60 hrs)

	INCERNA CENTRA & TECHNIQUES	1
1.	INSTRUMENTS & TECHNIQUES	_
	 Laboratory safety and good laboratory practices Principles and application of Laboratory instruments-microscope, incubator, 	7
	autoclave, centrifuge, LAF, filtration unit, shaker, pH meter.	
	3. Buffer preparation & titration	
	3. Cleaning and Sterilization of glassware's	
	4. Preparation of media- Nutrient Agar and Broth	
	5. Inoculation and culturing of bacteria in Nutrient agar and nutrient broth	
	6. Preparation of agar slant, stab, agar plate	
	7. Phenol Coefficient method to test the efficacy of disinfectants	
	BACTERIAL IDENTIFICATION	
II	1. Isolation of bacteria.	
	2. Identification of bacteria.	8
	3. Staining techniques: Gram's, Negative, Endospore, Capsule and Cell Wall.	0
	4. Cultural characteristics of bacteria on NA.	
	5. Pure culture techniques (Types of streaking).	
	6. Biochemical characterization: IMViC, Carbohydrate fermentation test,	
	Mannitol motility test, Gelatin liquefaction test, Urease test, Nitrate reduction test,	
	Catalase test, Oxidase test, Starch hydrolysis, Casein hydrolysis.	
	Camado Con Onidado Con Saron nyaronyoto, Casom nyaronyoto.	
	MYCOLOGICAL STUDY:	
III	Isolation of different fungi: Saprophytic, Coprophilous, Keratinophilic.	8
	2. Identification of fungi by lactophenol cotton blue method. <i>Rhizopus</i>	
	Saccharomyces, Penicillium, Peziza, Ustilago, Puccinia; Fusarium, Curvularia,	
	Alternaria.	
	3. Agaricus: Specimens of button stage and full-grown mushroom; Sectioning of	
	gillsof Agaricus.	
	4. Lichens: crustose, foliose and fruticose specimens.	
	PHYCOLOGY:	
IV	1. Type study of algae and Cyanobacteria -Spirullina, Nostoc. Chlorophyceae -	
	Chlorella, Volvox, Oedogonium, Cladophora, and Chara; Xanthophyceae –	7
	<i>Vaucheria</i> ; Bacillariophyceae – <i>Pinnularia</i> Phaeophyceae – <i>Sargassum R</i> hodophyceae	
	- Polysiphonia	
T 7	EXPERIMENTAL PLANT PATHOLOGY	
V	1. Preparation of fungal media (PDA) &Sterilization process.	8
	2. Isolation of pathogen from diseased leaf.	
	Identification: Pathological specimens of Brown spot of rice, Bacterial blight of rice,	
	Loose smut of wheat, Stem rot of mustard, Late blight of potato; Slides of uredial,	
	telial, pycnial & aecial stages of Puccinia, Few viral and bacterial plant diseases.	
T7T	PRACTICALS IN APPLIED MICROBIOLOGY-1	
VI	1. Isolation of nitrogen fixing bacteria from root nodules of legumes.	8
	2. Enumeration of rhizosphere to non-rhizosphere population of bacteria.	
	3. Isolation of antagonistic Pseudomonas from soil.	
	4. Microscopic observations of root colonization by VAM fungi.	
	5. Isolation of Azospirillum sp. from the roots of grasses.	
	6. Isolation of phyllosphere microflora.	
	7. Isolation of P solubilizing microorganisms.	
	PRACTICALS IN APPLIED MICROBIOLOGY-2	
VII	1. Wine production.	8
	2. Isolation of lactic acid bacteria from curd.	
	3. Isolation of lipolytic organisms from butter or cheese.	
	4. Immobilized bacterial cells for production of hydrolytic enzymes.	
	5. Enzyme production and assay – cellulase, protease and amylase.	
	6. Immobilization of yeast.	
	7. Isolation of cellulolytic and anaerobic sulphate reducing bacteria.	
	8. Isolation and characterization of acidophilic, alkalophilic and halophilic bacteria.	

1. Cultivation of Spirulina, & Chlorella in lab for biofuel	
VIII 2. Visit to NBAIM, Mau, Varanasi (Kashi)/ IMT, Chandigarh for viewing 6	
CultureRepository	
3. Visit to biofertilizers and biopesticides unit to understand about the Unit	
operation	
procedures	
4. Mushroom cultivation for Protein	
5. Alcohol production. from Sugarcane Juice.

This course can be opted as an elective by the students of following subjects: Open to all but special for B.Sc. Biotech, B.Sc. Microbiology, B.Sc. Agriculture, B.A. (Curators), B.A. Archaeology, B.A. Geology, BAMS.

Course prerequisites:

Qualification: To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Biotech/ Microbiology/biomedical Science.

Facilities: Smart and Interactive Class

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts
Lab Requisites: Microscopes, Stains, Dissection box, Haemocytometer, Specimens, Permanent slides, Autoclave, incubator, Oven, laminar flow cabinet, balances, Fermenter, Anaerobic jar and Spectrophotometer.

Programme: B.Sc.	Year: I	Semester: II Paper-I	
Subject: Botany			
Course Code: B040201T	Course Title: Archegoniates	and Plant Architecture	

Course outcomes:

After the completion of the course the students will be able to:

- 1. Develop critical understanding on morphology, anatomy and reproduction of Bryophytes, Pteridophytes and Gymnosperms
 - 2. Understanding of plant evolution and their transition to land habitat.
- 3. Understand morphology, anatomy, reproduction and developmental changes therein through typological study and create a knowledge base in understanding the basis of plant diversity, economic values & taxonomy of plants

4. Understand the details of external and internal structures of flowering plants.

Credits:	4	Core Compulsory	
Max. Marks: 25+50 Min. Passing Marks: As per CBCS norm		GC/University	
	Total No. of Lectures-Tutorials-Practical (in ho	urs per week): 4-0-0	
Unit	Topic		Lectures (60hrs)
I	Introduction to Archegoniates & Bryophytes Unique features of Archegoniates, Bryophytes: General characteristics, Classification (up to family) of Proskauer (1957), morphology, anatomy and reproduction of <i>Riccia</i> , <i>Marchantia</i> , <i>Anthoceros and Sphagnum</i> . (Developmental details not to be included). economic importance of bryophytes.		7
II	Pteridophytes General characteristics, Early land plants (<i>Rhynia</i>). Bierhorst (1971) with examples, morphology, anatomy <i>Selaginella</i> , <i>Equisetum and Marsilea</i> (Developmental det Heterospory and seed habit, stelar evolution.	and reproduction of Lycopodium,	8
III	Gymnosperms Classification (Pant-1957) and distribution of gymnosperms; economicimportance. Morphology, anatomy and reproduction of Cycas, Pinus and Ephedra (Developmental details not to be included).		8

IV	Palaeobotany Brief account of process of fossilization, types of fossils and study techniques; Geological time scale; Contribution of Birbal Sahni.	8
V	Angiosperm Morphology (Stem, Roots, Leaves & Flowers, Inflorescence) Morphology and modifications of roots; Stem & leaf. Types of inflorescences; flowers, flower parts, fruits and types of placentation;	7
VI	Plant Anatomy: Meristematic and permanent tissues. Apical meristems & theories on apical organization - Apical cell theory, Histogen theory, Tunica - Corpus theory. Secondary growth - Root and stem- cambium (structure and function) annular rings, Anomalous secondary growth - <i>Bignonia, Dracaena, Nyctanthus</i>	7
VII	Reproductive Botany Plant Embryology, Structure of microsporangium, microsporogenesis, Structure of megasporangium and its types, megasporogenesis, Structure and types of female gametophyte, types of pollination, Methods of pollination, structure of male gametophyte, Fertilization, structure of dicot and monocot embryo, Endosperm, Doublefertilization,	8
VIII	Palynology: Pollen structure, pollen morphology, pollen allergy, Applied Palynology: Basic concepts of Forensic palynology.	7

Programme: B.Sc.	Year: I	Semester: II Paper-II (Practical)		
Subject: Botany				
Course Code: B040202P Course Title: Land Plants Architecture				

Course outcomes:

- 1. The students will be made aware of the group of plants that have given rise to land habit and the flowering plants. Through field study they will be able to see these plants grow in nature and become familiar with the biodiversity.
- 2. Students would learn to create their small digital reports where they can capture the zoomed in and zoomed out pictures as well as videos in case, they are able to find some rare structure or phenomenon related to these plants.
- 3. Develop an understanding by observation and table study of representative members of phylogenetically important groups to learn the process of evolution in a broad sense.
- 4. Understand morphology, anatomy, reproduction and developmental changes therein through typological study and create a knowledge base in understanding plant diversity, economic values & taxonomy of lower group of plants
- 5. Understand the composition, modifications, internal structure & architecture of flowering plants for becoming a Botanist.

6.	
Credits: 2	Core Compulsory
Max. Marks: 25	Min. Passing Marks: As per UGC/University CBCS norm

Total No. of Lectures-Tutorials-Practical (in hours per week): 0-0-4

Unit	Topic	No. of Lectures
I	Bryophytes: Riccia &Marchantia- morphology of thallus, W.M. rhizoids and scales, V.S.thallus through Gemma cup, W.M. gemmae (all temporary slides), V.S. antheridiophore, archegoniophore, L.S. sporophyte (all permanent slides). Pogonatum- morphology, W.M. leaf, , permanent slides showing antheridial and archegonial heads, L.S. capsule.	8

TT 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	
II Pteridophytes:	
Selaginella: Habit, rhizophore T. S, stem T. S, axis with strobilus, V.S	S. of 7
strobilus, Megasporophyll and microsporophyll.	
Equisetum - Habit, rhizome and stem T.S. and V. S. of strobilus.	
Marsilea - Habit, rhizome and petiole T.S. and V.S and L.S of Sporocar	rp.
Azolla – Habitat & its structure	
II Gymnosperms	
Cycas – seedling, coralloid root and coralloid root T. S., T. S. of leaflet	
micro and mega sporophyll, male cone V. S., micro sporophyll T. S., en	itireand V. S.
of ovule.	11 P I G
Pinus - Branch of indefinite growth, spur shoot, T. S of old stemand ne	
and T. L. S. of stem, male and female cone, V.S. of male and female cor	
Ephedra & Thuja -: Habit, stem T. S (young and mature), leaf T. S, ma	le andfemale
strobilus, V. S. of male and female cone, ovule V. S. and seed.	
IV Palaeobotany & Palynology	
1. Morphology of Rhynia and fossils gymnosperms & other groups	6
2. Visit to Birbal Sahni Institute of Palaeobotany or virtual conference w	ith their
scientists to learn fossilization	
3. Mark and know about Indian geographical sites rich in plant fossils	
V Angiosperm Morphology	
1. To study of diversity in leaf shape, size and other foliar features.	0
2. To study monopodial and sympodial branching.	8
3. Morphology of Fruits	
4. Inflorescence types- study from fresh/ preserved specimens 5. Flowers- study of different types from fresh/ preserved specimens	
6. Fruits- study from different types from fresh/preserved specimens	
7. Study of ovules (permanent slides/ specimens/photographs)- types	(anatronous
orthotropous, amphitropous and campylotropous)	(anatropous,
8. Modifications in Roots, stems, leaves and inflorescences	
Plant Anatomy:	
VI Normal & Anomalous secondary thickening - Bignonia, Dracaena, Boen	rhaavia diffusa, 8
Nyctanthus	Tracervee day used,
Study of primary and secondary growth in root and stem of monocots an	d dicots by
section cutting and permanent slides.	
Study of internal structure of dicot and monocot leaves.	
Study of structure of stomata.	
Reproductive Botany	
VII 1. Structure of anther, microsporogenesis and pollen grains	
2. Structure of ovule and embryo sac development (through slides).	8
3. Study of embryo development in monocots and dicots.	
4. Vegetative propagation by means of cutting, budding and grafting exerci	ses.
5. Study of seed germination.	
6. Study of pollen morphology of the following plants – <i>Hibiscus, Vinca, B</i>	alsam, Ixora,
Crotalaria, Bougainvillea by microscopic observation.	
7. Calculation of pollen viability percentage using in vitro pollen germinat	ion techniques.
Commercial Uses and Production technology	
VIII 1. Azolla production	7
2. Production technology of Resins	
3. Production and propagation of Ornamental Pteris, Cycadales, Coniferales	s for
landscaping.	
4. Lab method for qualitative testing/ extraction of Ephedrine, Taxol and Tl	huja oil.

Trogramme. B.Sc.		Tour. II	Paper-I
	Subject: Botany		
Course Code: B040301T Course Title: Flowering Plants Identification & Aesthetic Characteristics		Aesthetic	

Year: II

Semester: III

course outcomes:

Programme: B Sc.

After the completion of the course the students will be able to:

- 1. To gain an understanding of the history and concepts underlying various approaches to plant taxonomy and classification.
- 2. To learn the major patterns of diversity among plants, and the characters and types of data used to classify plants.
- 3. To compare the different approaches to classification with regard to the analysis of data.
- 4. To become familiar with major taxa and their identifying characteristics, and to develop in depth knowledge of the current taxonomy of a major plant family.
- 5. To discover and use diverse taxonomic resources, reference materials, herbarium collections, publications.
- 6. For the entrepreneur career in plants, one can establish a nursery, start a landscaping business, set up a farm or Run a plantation consultancy firm

Credits: 4	Core Compulsory
Max. Marks: 25+50	Min. Passing Marks: As per UGC/University CBCS norm

Total No. of Lectures-Tutorials-Practical (in hours per week): 4-0-0

Unit	Торіс	No. of Lectures (60hrs)
I	Taxonomic Resources & Nomenclature Components of taxonomy (identification, nomenclature, classification); Taxonomic resources: Herbarium- functions& important herbaria, Botanical gardens, Flora. Botanical Nomenclature- Principles and rules of ICN.	7
П	Types of classification & Evidences Artificial, natural and phylogenetic. Bentham and Hooker (up to series), Taxonomic evidences from palynology, cytology, phytochemistry & Molecular biology data.	8
Ш	Identification of Angiospermic families -I: (Families can be chosen University wise as per local available flora) A study of the following families with emphasis on the morphological peculiarities and economic importance of its members (based on Bentham & Hooker's system) Ranunculaceae, Malvaceae, Fabaceae, Cucurbitaceae, Rubiaceae Asteraceae, Apocynaceae, Asclepiadiaceae, Solanaceae	8
IV	Identification of Angiospermic families -II: (Families can be chosen University wise as per local available flora) A study of the following families with emphasis on the morphological peculiarities and economic importance of its members (based on Bentham & Hooker's system)-Amaranthaceae, Euphorbiaceae, Papaveraceae, Orchidaceae, Liliaceae, Poaceae	7
V	Modern trends in Plant taxonomy: Phenetics and Cladistics: Brief idea on Phenetics, Numerical taxonomy- methods, Operational Taxonomic Units, Cladistics- construction of dendrogram and primary analysis; Monophyletic, polyphyletic and paraphyletic groups.	8
VI	TOOLS & SOFTWARES IN PLANT IDENTIFICATION- GIS (Mapping of (i) Patterns (ii) Features (iii) QuantitiesFree Phylogenetic Software, Digital Taxonomy, DEscription Language for TAxonomy – DELTA	7

VII	Computer Applications Introduction to Computers — classification, computer generation, software and hardware, operating systems, characteristics and application, computer memory and its types, data storage. Microsoft excel, data entry, graphs, formulas and functions.	7
VIII	Aesthetic Characteristics of Plants: Aesthetic characteristics of plants, English, Italian, Mughal and Japanese gardens; Features of a garden. Some Famous gardens of India. Conservatory, greenhouses, Indoor Garden, Roof Garden, Bonsai	8

Programme: B.Sc.	Year: II	Semester: III Paper-II (Practical)	
	Subject: Botany		
Course Code: B040302P	Course Title: Plant Identification technology		
Course outcomes:			
After the completion of the course the stud 1. To learn how plant specimens are collected		rmanent record.	

- 2. To observe, record, and employ plant morphological variation and the accompanying descriptive terminology.
- 3. To gain experience with the various tools and means available to identify plants.
- 4. To develop observational skills and field experience.
- 5. To identify a taxonomically diverse array of native plants.
- 6. To recognize common and major plant families.
- 7. To Understand aesthetic characters of flowering plants by making-landscapes, gardens, bonsai, miniatures

8. Comprehend the concepts of plant taxonomy and classification of Angiosperms.

Credits: 2	Core Compulsory	
	Min. Passing Marks: As per UGC/University CBCS norm	
Total No. of Lactures Tutorials Practical (in hours per week): 0.04		

Total No. of Lectures-Tutorials-Practical (in hours per week): **0-0-4**

Unit	Topic* *(Perform Any three experiments from each unit as per facility)	No. of Lectures (60Hrs)
I	Herbarium: Plant collecting, Preservation and Documentation:	
	Stepwise Practicing Herbarium techniques: a. FIELD EQUIPMENTS, Global Positioning	7
	System (GPS) instrument & Collection of any wild 25 plant specimens b. Learn to handle	
	Herbarium making tools c. Pressing and Drying of collected plant specimens d. Special	
	treatments for all varied groups of plants e. Mount on standard herbarium sheets f. Label the	
	using Standard method g. Organize them and give Index Register Number	

П	Taxonomic Identification using plant structure a. Classify 25 plants on the basis of Taxonomic description (Plant Morphology, Anatomy, Reproductive parts, Habit, adaptation anomalies) according to Bentham Hooker system of classification in the following families: Malvaceae, Fabaceae (Papilionaceae), Solanaceae, Scrophulariaceae, Acanthaceae, Labiatae (Lamiaceae), Rubiaceae.	8
III	Identification during excursions a. Conducting Spot identification (Binomial, Family) of common wild plants from families included in the theoretical syllabus (list to be provided) and making FIELD NOTE BOOK and filling Sample of a page of field-book, used in Botanical Survey of India. b. Describe/compare flowers in semi-technical language giving V.S. of flowers, T.S. of ovaries, floral diagrams and Floral Formulae. Identify and assign them to their respective families giving reasons.	8
IV	Collection, Preservation and Storage of Algae, Fungi, Bryophytes, Pteridophytes (Two Each)	7
V	Botanical Nomenclature & reporting Method: a. Give nomenclature to collected plants as per ICN rules and prepare labels as per BSI b. Author Citation, Effective Publication and Principle of Priority: To show a specimen paper on Basic structure of a taxonomic Research published on a new species in taxonomic journal	7
VI	 COMPUTERS Learning to use EXCEL Microsoft Power Point and Word, Working with Folder And Windows Utility., Create And ManageFiles And Folder Tree, Practice browsing of different sites using search engine. practice and understand different E-Mail services – Outlook, Yahoo mail, Rediff mail etc. Practice Creating E-Mail accounts, Sending, Receiving & Storing of mails. Create and participate in virtual conferencing in an interactive ZoomMeeting 	7
VII	Computer Application in taxonomy 1. Use Taxonomic Software's (Dichotomous Key) 2. Practical's on Phylogenetic analysis 3. Make line drawing of Plants for description 4. Using of plant identification apps on android phones	8
VIII	 Create a Bonsai of any plant Develop a miniature garden Draw Layouts of various types of gardens Plant Propagation methods practice 	8

This course can be opted as an elective by the students of following subjects: Open to all but special for B.Sc. Biotech, B.Sc. Forestry, B.Sc. Agriculture, B. Pharma, B.A. (Curators), B.A. Archaeology, B.A. Geology, BAMS

Course prerequisites:

Qualification: To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry).

Facilities: Smart and Interactive Class

Other Requisites: Video collection, Books, CDs, Flora, Herbarium, Access to On-line resources, Display Charts

Lab Requisites: Microscopes (Compound, Stereo) Dissection box, stain, Herbarium, Herbarium press, Dryers, Grinder, Reference Flora

Suggested equivalent online courses:

- 2. https://www.for.gov.bc.ca/hfd/pubs/docs/wp/wp18.pdf
- 3. https://www.researchgate.net/publication/267510854_The_Flowering_Plants_Handbook

Any Other:

Botanical Excursions: One teacher along with a batch not more than 7 students be taken for botanical excursion to places of Botanical interest, one in each term. If there are female students in a batch of 7 students, one additional lady teacher is permissible for excursion.

Each excursion will not be more than SEVEN days during college working days. T.A. and D.A. for teachers and non-teaching staff participating in excursions should be paid as per rules. Tour report duly certified by tour in charge teacher and Head of the Department should be submitted at the time of practical examination. For every study tour take the prior permission of the head of the department and Principal.

The marks will be counted under Internal assessment and external assessment both. In external assessment student will have to present his excursion report along with industrial training/central labs visits and BSI or Museum visits. In internal assessment he shall have to label the campus plants with botanical details/develop herbal/floristic garden/conserve plants in botanical garden/contribute specimens via collection.

A project supported along with photographs taken during field study to be submitted giving comprehensive idea about different types of inflorescences, flowers and fruits.

At least three field excursions at hills/Oceans/Deserts including one Compulsory excursion to Botanical Garden,FRI/BSI and Central National Herbarium (CNH). Central Research Institutes/Hot Spots

Programme: B.Sc.	Year: II	Semester: IV Paper-I
Subject: Botany		
	Course Title: Economic Botany, Ethnomedicine and Phytochemistry	

Course outcomes:

After the completion of the course the students will be able to:

- 1. Understand about the uses of plants –will know one plant-one employment
- 2. Understand phytochemical analysis related to medicinally important plants and economic products produced by the plants
- 3. know about the importance of Medicinal plants and its useful parts, economically important plants in our daily life and also about the traditional medicines and herbs, and its relevance in moderntimes.

	Credits:	Core Compulsory	
	Max. Marks: 25+50 Minor	n. Passing Marks: As per UGC/University CBC	CS
Total No. of Lectures-Tutorials-Practical (in hours per week): 4-0-0			
Unit	Торіс	No. of Lectures (60hrs)	
I	Origin and domestication of cultivated plants Centers of diversity of plants. Domestication and introduction production and uses of Cereals, legumes & Spices.	ion of crop plants. cultivation, 7	

II	Botany of oils, Fibers, timber yielding plants & dyes Study of the plants with Botanical names, Family, part used, and economic uses yielding Edible & essential oils; Sugar, Fibers; Rubber, Dyes, Timber, biofuel crops.	7
III	Commercial production of Flowers, Vegetables, and fruits (To be Chosen area wise) Commercial greenhouse cultivation of rose, Gladiolus, bell pepper, strawberry & Exotic leafy vegetables using Hydroponics.	7
IV	IPR & Traditional Knowledge IPR and WTO (TRIPS, WIPO), Patent Act 1970 and its amendments, Procedure of obtaining patents, Working of patents, Infringement, Copyrights, Trademarks, Geographical Indications, Traditional Knowledge and Digital Library.	8
V	Ethnobotany Methodologies of ethnobotanical research: Field work, Literature, Herbaria and Museum. Importance of ethnobotany in Indian systems of medicine(Siddha, Ayurveda and Unani), Role of AYUSH, NMPB, CIMAP and CARI.	8
VI	Medicinal aspects Study of common plants used by tribes (Aegle marmelos, Ficus religiosa, Cynadon dactylon, Eclipta alba, Oxalis and Ocimum sanctum) Preservation of primeval forests in the form of sacred groves of individual species. Plants in primary health care: common medicinal plants: Tinospora, Acorus, Ocimum, Turmeric and Aloe.	8
VII	Pharmacognosy Classification of drug plants based on sources of crude drugs – roots, rhizome, bulb, corm, leaves, stems, flowers, fruits and seeds. Organoleptic study of Adhatoda vasica, Andrographis paniculata, Azadirachta indica, Coriandrum sativum, Eclipta alba, Emblica officinalis, Ocimum sanctum, Ricinus communis, Vinca rosea and Zingiber officinale. Drug adulteration.	8
VIII	Herbal Preparations & Phytochemistry: Collection of wild herbs - Capsules – compresses. Hydrotherapy or Herbal bath - Herbal oils - Liquid extracts or Tincture - Poultices - Salves - Teas. Anthocyanins and Coumarins and therapeutic applications, Lignans, Terpenes, Volatile oils and Saponins, Carotenoids and Alkaloids and pharmacological activities.	7

Programme: B.Sc.	Year: II	Semester: IV Paper-II (Practical)
C. L D. A		

Subject: **Botany**

Course Code: B040402P Course Title: Commercial Botany & Phytochemical Analysis

Course outcomes: After the completion of the course the students will be able to:

- 1. Know about the commercial products produced from plants.
- 2. Gain the knowledge about cultivation practices of some economic crops.
- 3. Understand about the ethnobotanical details of plants.
- 4. Learn about the chemistry of plants &herbal preparations
- 5. Can become a protected cultivator, aromatic oil producer, Pharmacologist or quality analyst in drug company.

Credits: 2	Core Compulsory
Max. Marks: 25	Min. Passing Marks: As per UGC/University CBCS
	norm

Total No. of Lectures-Tutorials-Practical (in hours per week): 0-0-4

Unit	Topic (Perform minimum any three experiments from each unit)	No. of Lectures (60 hrs)
I	Economic Botany & Micro techniques: Cereals: Wheat (habit sketch, L.S./T.S. of grain, starch grains, micro-chemical tests); rice (habit sketch, study of paddy and grain, starch grains, micro-chemical tests) Legume: Pea or ground nut (habit, fruit, seed structure, micro-chemical tests) Source of sugars and starches: Sugarcane (habit sketch; cane juice- micro-chemical tests); potato (habit sketch, tuber morphology, T.S. of tuber to show localization of starch grains, W.M. of starch) grains, micro-chemical tests. Tea- tea leaves, tests for tannin Mustard- plant specimen, seeds, tests for fat in crushed seedsTimbers: section of young stem. Jute- specimen, transverse section of stem, tests for lignin on T.S. of stem and study of fiber following maceration technique. Study of specimens of economic importance mentioned in Unit I-& II	8
Ш	Commercial Cultivation Field visit to green houses for understanding Floriculture & vegetables production Development of hydroponics nutrient solutions & running models for cultivation of vegetables Development of hydroponics nutrient solutions & running models for cultivation of fodder	8
III	Cultivating Medicinal and aromatic plants & Essential oil extraction Lemon grass/ Neem/ Zinger /Rose/Mint	7

IV	Documentation from Traditional Knowledge Digital Library, Mark the Geographic Indications on Map, Understand –Nakshatra Vatika, Navgrah vatika and develop in your college To extract the names of the plants and Botanical uses depicted in our epics. Visit NISCAIR, New Delhi	7
V	Ethnobotany Study of common plants used by tribes. Aegle marmelos, Ficus religiosa, Cynadon dactylon, Visit a tribal area and collect information on their traditional method of treatment usingcrude drugs. Familiarize with at least 5 folk medicines and study the cultivation, extraction and its medicinal application. Observe the plants of ethnobotanical importance in your area. Visit to an Ayurveda college or Ayurvedic Research Institute / Hospital	7
VI	Instrumentation and herbal Preparations Develop Capsules of herbs/ Develop Herbal oils/ Develop Poultice/cream Analyze some active ingredients using chromatography/Spectrophotometry	8
VII	Pharmacognosy Organoleptic studies of plants mentioned in the theory: 1. Morphological studies of vegetative and floral parts. 2. Microscopic preparations of root, stem and leaf. 3. Stomatal number and stomatal index. 4. Vein islet number. 5. Palisade ratio. 6. Fibers and vessels (maceration). 7. Starch test 8. Proteins and lipid test	8
VIII	Phytochemistry: Determination of the percentage of foreign leaf in a drug composed of a mixture of leaves. Dimensions of Calcium oxalate crystals in powdered crude drug. Preliminary phytochemical tests for alkaloids, terpenoids, glycosides, volatile oils, tannins& resins. Any 5 herbal preparations.	7

Programme: B.Sc.	Year: III	Semester: V Paper-I
Sub	ject: BOTANY	
Course Code: B040501T	Course Title: Plant Physiology Biochemistry	, Metabolism &

Course outcomes:

After the completion of the course the students will be able to:

- 1. Understand the role of Physiological and metabolic processes for plant growth and development.
- 2. Learn the symptoms of Mineral Deficiency in crops and their management.
- 3. Assimilate Knowledge about Biochemical constitution of plant diversity.
- 4. Know the role of plants in development of natural products, dietary supplements, antioxidants

Credits: 4	Core Compulsory
Max. Marks: 25+50	Min. Passing Marks: As per UGC/University CBCS norm

Total No. of Lectures-Tutorials-Practical (in hours per week) 4-0-0

Unit	Торіс	No. of Lectures(60hrs)
I	Plant water relation, Mineral Nutrition, Transpiration and translocation in phloem Brief idea of diffusion, osmosis and water, water potential, Transpiration and its significance; Root pressure and guttation. Criteria of essentiality of elements; Symptoms of mineral deficiency. Mechanism and theories of ion uptake and translocation, active and passive transport,	7
II	Carbon Oxidation Glycolysis, fate of pyruvate, aerobic and anaerobic respiration and fermentation, Krebs cycle, oxidative decarboxylation of pyruvate, mitochondrial electron transport, oxidative phosphorylation, factors affecting respiration.	7
III	Nitrogen Metabolism Nitrate assimilation, biological nitrogen fixation (examples of legumes and non-legumes), Physiology and biochemistry of nitrogen fixation, importance of nitrogen metabolism.	8
IV	Lipid Metabolism: Synthesis and breakdown of triglycerides, oxidation, gluconeogenesis and its role in mobilization of lipids during seed germination. Photosynthesis: Pigments, Electron transport system and Photophosphorylation, C3 & C4 photosynthesis, CAM- Reaction and Significance.	7
V	Plant Development, Movements, Dormancy & Responses Developmental roles of Phytohormones (auxins, gibberellins, cytokinin's, ABA, ethylene). Photoperiodism (SDP, LDP, Day neutral plants); Phytochrome (discovery, structure and function), Seed Dormancy, Vernalization.	8

VI	Biomolecules Carbohydrates: Nomenclature and classification; Role of monosaccharides (glucose, fructose); Disaccharides (sucrose), Oligosaccharides and polysaccharides (structural-cellulose, storage – starch). Lipids: Storage lipids: Fatty acids structure and functions, Structural lipids: Phosphoglycerides.	8
VII	Proteins: Structure of amino acids; Peptide bonds; Levels of protein structure-primary, secondary, tertiary and quaternary; Isoelectric point; Protein denaturation. Nucleic acids: Structure of nitrogenous bases; Structure and function of nucleic acids, Nucleic acid denaturation & Renaturation.	7
VIII	Enzymes: Structure of enzyme: holoenzyme, apoenzyme, cofactors, coenzymes and prosthetic group. Mechanism of action (activation energy, lock and key hypothesis, induced - fit theory), factors affecting enzyme activity, Allosteric enzymes & Abymes.	8

	Programme: B.Sc.	Year: III		ester: V e r-II (Practical)

	*(Perform any	three from each unit based on facil	lity)	(00 ms.)
I	leaves of <i>Rhoeo / Tradescantia</i> . 2. Osmosis – by potato osmoscope 3. Effect of temperature on absorption of Q10. 4. Experiment to demonstrate the transport of Structure of stomata (dicot & modern of the moder	experiment	I determination ell jar method ment: otometer otometer ethod.	15

II	Nitrogen Metabolism, Photo Synthesis & Respiration 1. A basic idea of chromatography: Principle, paper chromatography and column chromatography; demonstration of column chromatography. 2. Separation of plastidial pigments by solvent and paper chromatography. 3. Estimation of total chlorophyll content from different chronologically aged leaves (young, mature and senescence) by Arnon method.	15
	 4. Effect of HCO3 concentration on oxygen evolution during photosynthesis in an aquatic plant and to find out the optimum and toxic concentration (either by volume measurement or bubble counting). 5. Measurement of oxygen uptake by respiring tissue (per /hr.) 6. Determination of the RQ of germinating seeds. 	
	7. Effect of light intensity on oxygen evolution in photosynthesis using Wilmott' bubble	
III	Plant Development, Movements, Dormancy & Responses 1. Geotropism and phototropism — Klinostàt 2. Hydrotropism -	15
	a. Measurement of growth — Arc and lever auxanometer	
	3. To study the phenomenon of seed germination (effect of light).4. To study the induction of amylase activity in germinating grains.	
	5. Test of seed viability by TTC method.	
	6. To study the effect of different concentrations of IAA on <i>Avena</i> coleoptile elongation (IAA bioassay)	
	Techniques for biochemical analysis	
IV	 Weighing and Preparation of solutions -percentage, molar & normal solutions, dilution from stock solution etc. 	15
	 Separation of amino acids by paper chromatography. Detection of organic acids: citric, tartaric, oxalic and malic from laboratory samples., 	
	4. Qualitative Analysis of carbohydrates,	
	5. Estimation of reducing sugar by anthrone method,6. Qualitative Analysis of Lipids	
	7. Qualitative Analysis of Lipids 7. Qualitative analysis of Amino acids and Proteins	
	8. Quantitative Analysis of Nucleic Acids,	
	9. Analysis of dietary supplements, nutraceuticals & antioxidants10. Testing of adulterants in food items.

This course can be opted as an elective by the students of following subjects: Open to all butspecial for following: B.Sc. Math, B.Sc. Statistics, B.Sc. Nutrition, B.Sc. Biophysics, B.Sc. Biotech.

Course prerequisites:

Qualification: To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill

Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry/ Biotech/ /Gardening)

Facilities: Smart and Interactive Class

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts

Suggested equivalent online courses:

Programme: B.Sc.	Year: III	Semester: V Paper-III		
Subject: BOTANY				
Course Code: B040502T	Course Title: Molecular Biology & Bioinformatics			

Course outcomes:

After the completion of the course the students will be able to:

- 1. Understand nucleic acids, organization of DNA in prokaryotes and Eukaryotes, DNA replication mechanism, geneticcode and transcription process.
- 2. Know about Processing and modification of RNA and translation process, function and regulation of expression.
- 3. Gain working knowledge of the practical and theoretical concepts of bioinformatics

Credits: 4	Core Compulsory
Max. Marks: 25+50	Min. Passing Marks: As per UGC/University CBCS norm

Total No. of Lectures-Tutorials-Practical (in hours per week) 4-0-0

Unit	Торіс	No. of Lectures(60hrs)
I	Genetic material DNA structure, types of DNA, types of genetic material. Packaging of DNA. DNA replication (Prokaryotes): Semi–conservative, conservative and dispersive modes of replication. Mechanism of replication, Enzymes of replication.	7
II	Transcription & Regulation of gene expression Transcription-Types and structures of RNA (mRNA, tRNA, rRNA), RNA polymerase- various types. Translation, (Prokaryotes), genetic code. Regulation of gene expression in Prokaryotes: Lac operon	7

III	Principles & Techniques of genetic engineering r-DNA, c-DNA, Vectors and enzymes of genetic engineering. Blotting techniques: Northern, Southern and Western Blotting, DNA Fingerprinting; PCR and Reverse Transcriptase-PCR. Hybridoma and monoclonal antibodies.	8
IV	Applications of Genetic engineering Pest resistant (Bt-cotton); herbicide resistant plants (RoundUp Ready soybean); Transgenic crops with improved quality traits (Flavr Savr tomato, Golden rice); Role of transgenics in bioremediation (Superbug); Industrial enzymes (Protease, Lipase);	7
V	Bioinformatics & its applications Brief ideas of programming languages in bioinformatics Scope of bioinformatics - Genomics, Transcriptomics, Proteomics, Applications and Limitations of bioinformatics.	8
VI	Biological databases Introduction to biological databases - primary, secondary and composite databases, NCBI, nucleic acid databases (GenBank, EMBL, DDBJ, NDB), protein databases (PIR, Swiss- Prot, PDB),	8
VII	Data Generation and Data Retrieval Generation of data (Gene sequencing, Protein sequencing), Sequence submission tools (BankIt, Sequin, Webin); Sequence file format (FASTA, EMBL, Clustal, Swiss-Prot); Sequence annotation; Dataretrieval systems (SRS, Entrez).	7
VIII	Phylogenetic analysis Similarity, identity and homology, Alignment – local and global alignment, pairwise and multiple sequence alignments. Methods of Alignment (BLAST and FASTA); Phylogenetic analysis: Construction of phylogenetic tree, methods of construction of phylogenetic trees.	8

Programme: B.Sc.	Year: III	Semester: VI Paper-I
	Subject: Botany	
Course Code: B040601T	Course Title: Cytogen Nanotechnology	etics, Plant Breeding &

Course outcomes: After the completion of the course the students will be able:

- 1. Acquire knowledge on ultrastructure of cell.
- 2. Understand the structure and chemical composition of chromatin and concept of cell division.
- 3. Interpret the Mendel's principles, acquire knowledge on cytoplasmic inheritance and sex-linked inheritance.
- 4. Understand the molecular mechanism of mutation

4. Unde	rstand the molecular mechanism of mutation.		
	Credits: 4	Core C	Compulsory
	Max. Marks: 25+50	Min. Passing Marks: As pe UGC/University CBCS nor	
	Total No. of Lectures-Tutorials-Practical (in hours p	er week): 4-0-0	
Unit	Торіс		No. of Lectures (60 hrs)
I	Cell biology Structure and function of Cell, cell wall, plasma membrane, reticulum, mitochondria, chloroplast, peroxisomes - Organiza envelope, nucleoplasm and nucleolus. Structure of chromosome. Chromosomal nomenclature- chromat satellite, secondary constriction. Organization of chromosomes- I Cell cycle: –mitosis, meiosis,	ation of nucleus: nuclear ids, centromere, telomere,	8
II	Genetics Brief idea about Mendel's theory of inheritance, Chromoson crossing over and linkage; Interaction of Genes; Polygenic is Inheritance, Concept of sex determination and Sex chromodetermination in plants.	nheritance; Extra-nuclear	7
III	Plant breeding Plant introduction. Agencies of plant introduction in India, Pro- Acclimatization. Selection - mass selection, pure line selection and clonal selection Hybridization: inter generic, inter specific, inter varietal hybridiz Male sterility, Mutation, Molecular Breeding, achievements in Ir of Kalanamak variety of rice in Terai region of eastern U P.	n. ation with examples.	8
VI	Biostatistics: Definition, statistical methods, basic principles, variables- m limitations and uses of statistics. Central tendency— Arithmetic Mean, Mode and Median; Standard Test of significance: chi- square test for goodness of fit. Computer application in biostatistics - MS Excel.		7
V	Plant tissue culture Principles, components and techniques of in vitro plant cultures, isolation and culturing of protoplast- principle and application, reprotoplast fusion and somatic hybridization- selection of hybrid c	egeneration of protoplasts,	8

	VI	Nanotechnology Fundamentals of nanoscale self-assembly process involved in important functional biomolecules such as Nucleic acid (DNA and RNA), Proteins, Enzymes, Advantages and applications of biologically synthesized nanomaterials. Biomineralization, Magnetosomes, nano-pesticides, nano-fertilizers, nano-sensors.	7
	VII	Artificial Intelligence in Plant Sciences Big Data Analytics, Blockchain Technology, Machine learning, Expert systems and Fuzzy logic, Artificial Neural Networks and Genetic algorithms, Applications of Artificial Neural Networks in Plant Science.	8
`	'III	Introduction to use of Digital technologies – AI, IoT & ICT in Botany Educational software- INFLIBNET, internet as a knowledge repository-google scholar, science direct. weather forecasting. Database management, platforms, Graphical user interface, ICT Applications for different crops and horticulture	7

This course can be opted as an elective by the students of following subjects:

Open to all but special for B.Sc. Biotech, B.Sc. Forestry, B.Sc. Agriculture, B. Pharma, B.Sc. Food Science, B.A. (Curators), B.A. Geology.

Course pre-requisites:

Qualification: To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry/ Biotech/Math/Statistics/Chemistry/ Computer Science)

Facilities: Smart and Interactive Class

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts

Suggested equivalent online courses:

https://www.cytology-iac.org/educational-resources/virtual-slide-library

https://www.asct.com/ASCTWeb/Content/Cytopreparation Online Course.aspx

https://www.mooc-list.com/tags/genetics

https://www.coursera.org/learn/genetics-evolution

https://www.my-mooc.com/en/mooc/introduction-to-genetics-and-evolution/

Further Suggestions:

Access to Statistics, Chemistry, Math and Biotechnology resources will be required

Programme: B.Sc.		Year: III		Semester: VI Paper-II (Practical)	
	Subject: Botany				
C	Course Code: B040603P Course Title: Lab on Cytogenetics, Biostatistics and Tissue Culture				
Course	outco	nes: After the completion of the cour	se the students will be	able:	
1.	_				
2.	Can b	e employed in environment impact as	sessment companies &	start his o	own venture
		Credits: 2			Core Compulsory
	Max. Marks: 25 Min. Passing Marks: As per UGC/University CBCS norm				
	Total No. of Lectures-Tutorials-Practical (in hours per week): 0-0-4				
1	Unit Topic No. of Lectures (60 hrs)				

	Cell biology		
I	Study of plant cell structure with the help of epidermal peal mount of Onion / Rhoeo / Crinum		
	2. Measurement of cell size by the technique of micrometry.		
	3. Counting cells per unit volume with the help of haemocytometer		
	(Yeast/pollen grains)		
	4. Determination of mitotic index and frequency of different mitotic stages in pre-		
	fixed root tips of Allium cepa.		
II	Genetics		
	1. Monohybrid cross (Dominance and incomplete dominance)		
	2. Dihybrid cross (Dominance and incomplete dominance)	15	
	3. Gene interactions (All types of gene interactions mentioned in the syllabus)		
	a. Recessive epistasis 9: 3: 1.		
	b. Dominant epistasis 12: 3: I		
	c. Complementary genes 9: 7		
	d. Duplicate genes with cumulative effect 9: 6: 1		
	e. Inhibitory genes 13: 3		
	4. Observe the genetic variations among inter and intra specific plants. Demonstration of Breeding Techniques- Hybridization, case studies of mutation, polyploidy, emasculation experiment		
III	 Biostatistics: Univariate analysis of statistical data: Statistical tables, mean, mode, median, standard deviation and standard error (using seedling population / leaflet size). Calculation of correlation coefficient values and finding out the probability. Determination of goodness of fit in Mendelian and modified mono-and dihybrid ratios (3:1, 1:1, 9:3:3:1, 1:1:1:1, 9:7, 13:3, 15:1) by Chi-square analysis and comment on the nature of inheritance. Computer application in biostatistics - MS Excel and SPSS 	15	
IV	Plant tissue culture		
	1. Familiarization of instruments and special equipment's used in the plant	15	
	tissueculture experiments		
	2. Preparation of plant tissue culture medium, and sterilization, Preparation of stock		
	solutions of nutrients for MS Media. 3. Surface sterilization of plant materials for inoculation (implantation in the		
	medium)		
	Micropropagation of potato/tomato/ - Demonstration 5. Protoplast isolation and		
	culturing – Demonstration		
	culturing – Demonstration		

Programme: B.Sc.	Year: III	Semester: VI Paper-III	
	Subject: Botany		
Course Code: B040602T	Course Title: Ecolog	gy & Environment	
make them understand method ecosystem functions, and principle.	olex interrelationship between organ s for studying vegetation, communi- ples of phytogeography. olving strategies for sustainable nat	ity patterns and processes,	
Credits: 4 Core Compulsory			
Max. Marks: 25+50	in. Passing Marks: As per UGC/University BCS norm		

	Total No. of Lectures-Tutorials-Practical (in hours per week): 4-0-0	
Unit	Topic	No. of Lectures (60 hrs.)
I	Natural resources & Sustainable utilization: Soil degradation and management strategies; Wetlands; Threats and management strategies, Ramsar sites, Forests: Major and minor forest products; Depletion, Biological Invasion, Energy: Renewable and non-renewable sources of energy,	7
II	Ecology & Ecosystem Definition of Ecology, Ecological Factors: Abiotic and biotic com-, Ecosystem – Ecosystem-structure and function. Energy flow in an ecosystem Ecological Succession- Hydrosere and Xerosere. Food chains and food webs, Ecological pyramids, Ecosystems Ecological Adaptations – Hydrophytes, Xerophytes, Halophytes,	8
III	Soil Formation, Properties & Conservation Soil Formation & composition, Soil types, Soil Profile, Soil Erosion, Biogeochemical cycles. Soil Conservation: Biological—, Mulching, Strip cropping and Crop rotation. Mechanical—Basin Listing, Soil reclamation	7
IV	Biodiversity and its conservation: Definition -genetic, species, and ecosystem diversity. hot spots of Biodiversity & threats to biodiversity, Endemic and endangered species of plants in India. Conservation of Biodiversity: Ex-situ and in-situ conservation, Red data book, botanical gardens, National park, Sanctuaries, Bioreserves.	7
V	Phytogeography: Biogeographic regions of India, Natural vegetation of India, basic principles governing geographical distribution of plants (Age area hypothesis and Continental drifttheory), Phytogeographical regions of India, Vegetational types in Uttar Pradesh.	7
VI	Environmental audit & Sustainability Concept of environmental audit; Guidelines of environmental audit; Environmental standards: ISO 14000series; Scheme of labelling of environment friendly products (Ecomark); Concept of energy and green audit, Concept of Sustainable Agriculture; India's environment action Programme: issues, approaches and initiatives towards Sustainability; Concept of ecological footprints.	8
VII	Pollution, Waste management & Circular Economy Environmental pollution, Environmental protection laws, Activated Sludge Process (ASP), regulatory framework for pollution monitoring and control; implementation of CNG; Waste- Types, collection and disposal, Recycling of solid wastes (hazardous & non-hazardous) -	8
VIII	Environmental ethics, Carbon Credits &Role of GIS Carbon credit: concept, exchange of carbon credits. Carbon sequestration, importance, meaning and ways. Climate change, global warming, acid rain, ozone layer depletion, Wasteland reclamation. Geographical Information Systems: components; spatial and non-spatial data; GIS software packages.	8

	Total No. of Lectures-Tuto	orials-Practical (in hou	rs per weel	k): 0-0-4
Unit Topic				No. of Lectures (60 hrs)

	Ecology & environment	
I	 Ecological Adaptations – Hydrophytes, Xerophytes, Halophytes, Epiphytes and Parasites (a). Study of morphological adaptations of hydrophytes andxerophytes (four each). (b). Study of biotic interactions of: Stem parasite (<i>Cuscuta</i>), Root parasite (<i>Orobanche</i>) Epiphytes, Predation (Insectivorous plants). Observation and study of different ecosystems mentioned in thesyllabus. Field visit to familiarize students with ecology of different sites 	15
П	 Soil Formation, Properties & Conservation Determination of pH of various soil and water samples (pH meter, universal indicator/Lovibond comparator and pH paper) Analysis for carbonates, chlorides, nitrates, sulphates, organic matter and base deficiency from two soil samples by rapid field tests. Determination of organic matter of different soil samples by Walkley & Black rapid titration method. Soil Profile study Soil types of India-Maps 	15
Ш	Biodiversity and Phytogeography: 1. Study of community structure by quadrat method and determination of (i) Minimal size of the quadrat, (ii) Frequency, density and abundance of components (to be done during excursion/field visit). 2. Marking of vegetation types of India, World & Uttar Pradesh on maps 3. Phytogeographical areas of India	15
IV	 Pollution &Waste management Study of instruments used to measure microclimatic variables: Soil thermometer, maximum and minimum thermometer, anemometer, psychrometer/hygrometer, rain gauge and lux meter Estimation of chloride and dissolved oxygen content in water sample Comparative anatomical studies of leaves form polluted and less polluted areas. Measurement of dissolved O₂ by azide modification of Winkler's method. Determination of dissolved oxygen of water samples from polluted and unpolluted sources. Microbiological assessment of drinking water using MPN technique- water from well, river, water supply department and packaged drinking water Making kitchen waste from compost/vermicompost by Enzymes/Bio decomposer/ Whey with dung. Climate Change, Carbon Credits &Role of GIS Conducting Waste Audit of your Institution -Demo 	15
