

During the online e-learning session following queries raised by the students and the answers provided by me are mentioned:

1.) What is Implementation of M.I.S.?

Answer: Implementation includes all those activities that take place to convert from an old system to a new system. The newly implemented system may be totally new, replacing an existing manual or automated system, or it may be a major modification to an existing system. Information system cannot be implemented in a day in business. There are too many direct and indirect effects on organization, work methods, job description etc. The pace at which the implementation occurs is not entirely under the control of the system designer. The implementation has been accomplished when output of M.I.S. are continuously utilized by makers.

2.) What are the tasks involved in the implementation of M.I.S.?

Answer: The steps involved in implementation of M.I.S. are mentioned as under:

- (a) Organizing personnel for implementation.
- (b) Acquiring and laying out facilities and offices.
- (c) Developing procedures for implementation and testing.
- (d) Developing training program for operating personnel.
- (e) Completing the system software.
- (f) Acquiring requisite hardware.
- (g) Designing forms.
- (h) Generating files.
- (i) Completing cutover to a new system.
- (j) Obtaining acceptance.
- (k) Testing the entire system.
- (l) Providing system maintainance (debugging and improving).

3.) What are the conversion strategies of M.I.S.?

Answer: The major conversion strategies of M.I.S. implementation are given as under:

- (a) Direct Conversion.
- (b) Parallel Conversion.
- (c) Modular/Pilot Conversion.
- (d) Phase Conversion.
