

**Report of the E-Learning Activities through Zoom App**

**By Mr. Shivam Shukla**

**Assistant Professor**

**Department of Commerce**

**Date: 28-04-2020**

During the online e-learning session following queries raised by the students and the answers provided by me are mentioned:

1.) What is Feasibility Analysis?

Answer: Feasibility analysis is the process of confirming that a strategy, plan or design is possible and makes sense. This can be used to validate assumptions, constraints, decisions, approaches and business cases. A feasibility study aims to objectively and rationally uncover the strength and weaknesses if an existing business or proposed venture, opportunities and threats present in the environment, the resources required to carry through and ultimately the prospects for success.

2.) What are the steps involves in the design if M.I.S.?

Answer: The steps involved in the design if M.I.S. are mentioned as under:

- (a) Problem Definition.
- (b) Conducting advanced system planning & feasibility analysis.
- (c) Developing program. requirement and operational requirements.
- (d) Identifying Constraints.
- (e) Determining Information Sources.
- (f) Developing Alternative Designs.
- (g) Documentation of selected Design.
- (h) Report presentation and review of system.

3.) What are the major constraints in operation of M.I.S.?

Answer: The major constraints in operation of M.I.S. are given as under:

- (a) Non Standardized Approach.
- (b) Non availability of experts.
- (c) Improper grooming of internal staff.
- (d) Problem in sub-system selection and development.
- (e) Non availability of cooperation from staff.

4.) What are the limitations of M.I.S.?

Answer: The following are limitations of M.I.S. :

- (a) Quality of Input and Output.
- (b) M.I.S. is not a substitute for management.
- (c) M.I.S. cannot support every type of decision.
- (d) Qualitative factors are ignored.
- (e) Difficult to install an M.I.S. (Time and Cost factors)
